JAVIER HERRANZ LAZO

Process & Transformation Manager | AI-enabled Automation | Operational Excellence

Santiago, Chile | linkedin.com/in/jherranzlazo | javier.herranz.lazo@gmail.com | +56 9 3118 6532

PROFESSIONAL SUMMARY

Process and transformation leader with 10+ years of experience leading business transformation, operational excellence, project management, service design, and technology-enabled process improvement across ecommerce and telecommunications.

Focused on scaling AI-enabled transformation by combining process redesign, automation, governance, and change management. Practical experience with n8n, GPT, Claude, Asana, Slack, Google Workspace, AI agents, and knowledge workflows.

Experienced translating strategic business challenges into scalable operating models, mobilizing cross-functional teams, and connecting processes, technology, data, and people to deliver measurable business outcomes.

CORE EXPERTISE

Process transformation • Operational excellence • AI-enabled transformation • Business process automation • Change management • Process governance • Project and program management • Continuous improvement • Service design • AI adoption • Cross-functional leadership • KPI and OKR management

PROFESSIONAL EXPERIENCE

Grupo TRAFILEA — Ecommerce Uruguay / US | Jan 2025 — Present

Process and Audit Manager | Remote

Lead process transformation, audit, operational improvement, and AI-enabled operating-model work in a global remote consumer technology and ecommerce organization.

• Lead cross-functional process transformation, identifying operational gaps, redesigning workflows, and establishing scalable governance models.

• Drive AI and automation adoption using n8n, GPT, Claude, Slack, Asana, and Google Workspace.

• Develop AI-enabled workflows and agents to automate operational activities and improve access to organizational knowledge.

• Lead process governance covering ownership, KPI, documentation, controls, execution cadence, and continuous improvement.

• Prioritize improvement opportunities by business impact, scalability, and implementation effort.

WOM Chile | Jan 2022 — Jan 2025

Process and Project Manager | Santiago, Chile

Led process and transformation initiatives across the organization, connecting business strategy, customer experience, technology, and operational execution.

• Led strategic process and project initiatives focused on business efficiency, customer experience, and operational performance.

• Identified opportunities to redesign processes through technology, automation, and new operating models.

• Coordinated multidisciplinary business and technology teams through implementation.

• Defined process performance mechanisms and supported KPI-driven continuous improvement.

• Applied agile methods and change-management practices to accelerate adoption.

PROFESSIONAL EXPERIENCE

WOM Chile | Jul 2019 — Apr 2022

Area Head — Projects, Service Design and UAT | Santiago, Chile

Led a cross-functional team transforming customer and employee journeys through platform, process, and service-design improvements.

• Led transformation projects affecting critical operational and customer-experience KPIs.

• Designed improvements to key journeys combining service design, process redesign, and technology.

• Managed large-scale projects with multiple business and technology stakeholders.

• Used customer insights, user testing, and operational data to identify and prioritize improvement opportunities.

• Promoted customer-centered design while balancing business impact and operational feasibility.

WOM Chile | Nov 2018 — Jul 2019

Project Manager — S&OP; VP | Santiago, Chile

Led technology-enabled initiatives improving internal processes and customer touchpoints, with a focus on operational efficiency and employee enablement.

• Coordinated business and technology stakeholders from opportunity identification through implementation.

• Managed initiatives focused on efficiency, process improvement, and employee enablement.

WOM Chile | Jan 2018 — Nov 2018

Project Specialist | Santiago, Chile

Managed initiatives from ideation to implementation focused on revenue generation, efficiency, and eliminating non-value-added activities.

• Used technology as a key enabler of business and operational transformation.

Audiocom Ingeniería e Integración AV | Mar 2017 — Jan 2018

Owner — Sales and A/V Project Integration | Santiago, Chile

Managed commercial development, consultative sales, and project administration for an acoustic engineering and audiovisual integration business.

• Led requirements analysis, proposal development, and project coordination.

Audiomusica | Dec 2015 — Mar 2017

Project Engineer | Santiago, Chile

Designed integrated audiovisual solutions for corporate clients and translated requirements into technical and commercial proposals.

• Managed presales engineering and solution design for complex implementation projects.

SELECTED TRANSFORMATION INITIATIVES

• AI adoption and enablement operating model.

• AI-Native model implementation for the shift from Fullstack to Product Engineers.

• Cross-company automation team leadership and backlog governance.

- AI Champions and ambassador program.
- n8n and AI process automation program.
- AI tools usage and cost governance.
